Dear Dr. Svanstrom:

Subject: Request for Support and Guidance on Kitamoto City's Safety Promotion
Activities to become a Member of the International Safe Community
Network

Kitamoto City has been developing a variety of safety promotion activities aiming to make the regional community safe and secure for the citizens, affiliates and the region. We think that we can secure more safety and security by making these activities to be based on the concept of Safe Community. I, on behalf of the residents of Kitamoto City, hereby declare that the City will promote the movement of Safe Community based on following items.

1. We will make global standard city-planning activities to enhance the security of life and the quality of health in total of the regional community, putting emphasis on the prevention, based on the concept of Safe Community that injuries are not caused by accident and can be prevented
2. Through efforts toward designation as a member of the International Safe Community Network, we will arrange firmly to provide a system which prevents injuries, accidents, crimes, violence, and self-harm by power of residential community, and will work harder to promote safer and securer community planning.

3. As a measure to realize “Kitamoto City where people want to continue to live in forever”, we will struggle actively to acquire designation as a Safe Community member, and will promote safe and secure community planning that the citizens can be proud of.

Kitamoto City will promote Safe Community activities enthusiastically, holding up acquisition of designation as a member of Safe Community anew in the “later term basic plan of Kitamoto City fourth total promotion plan” to improve safety and securities for the citizens. Therefore, we would like to ask your support and guidance toward Kitamoto City’s designation as Safe Community.
